

Step 1: Run `python train_model.py` in terminal.

Output observed:

Dataset Preview:

sepal_length	sepal_width	petal_length	petal_width	species
5.1	3.5	1.4	0.2	Setosa
4.9	3.0	1.4	0.2	Setosa
4.7	3.2	1.3	0.2	Setosa
4.6	3.1	1.5	0.2	Setosa
5.0	3.6	1.4	0.2	Setosa

Model trained successfully!

Step 2: Run `python app.py` in terminal.

Output observed:

Running on <http://127.0.0.1:5000>

Iris Flower Prediction

Predicted Flower: Virginica
